

BIU Cyber Graduate Studies and Fellowships

The BIU Center for Research in Applied Cryptography and Cyber Security provides lucrative fellowships to graduate students of the center. The center invites excellent students to apply for a graduate position in the center. For more information on the center and its activities, see the center website.

Topics of Research

The center focuses on research in the following areas: applied cryptography, applications of machine learning, natural language processing and artificial intelligence to cyber security, hardware security, and general network and systems security. The center will help accepted students find an advisor according to their research interest.

Fellowships

The fellowships offered by the center are as follows:

- M.Sc. first year – 5,500 NIS per month
- M.Sc. second year – 6,500 NIS per month
- Ph.D. first year – 7,500 NIS per month
- Ph.D. after research proposal accepted – 8,500 NIS per month

The fellowships may be provided as a full “milga” or as part “milga” and part salary. Students receiving fellowships are required to devote full time to their studies.

In addition to the fellowships, student may earn an additional salary that may be earned by TAing (תרגול).
